    - *Reusing templates*
  - *Summary*
- **13. Creating a search feature**
  - *Setup*
  - *Adding a search form*
  - *Updating the index view*
  - *Details*
  - *Summary*
- **14. Working with forms: creating items**
  - *Setup*
  - *Creating the edit form*
  - *Creating the form class*

- *Updating urlpatterns*
- *Creating the view function*
- *Adding a menu item*
- *Details*
  - *Protecting against cross site request forgeries*
  - *Adding form fields*
  - *Using the Form class*
  - *Examining the view function*
- *Summary*
  
- **15. Working with forms: editing items**
  - *Setup*
  - *Adding the path*
  - *Creating the edit view*
  - *Updating the edit link*
  - *Details*
    - *Capturing the id*
    - *Examining the edit view*
  - *Summary*
  
- **16. Working with forms: customization**
  - *Setup*
  - *Adding the description field*
  - *Details*
    - *Changing field order*
    - *Customizing validation errors*
  - *Summary*
  
- **17. Creating and deleting objects**
  - *Setup*
  - *Adding the delete path*
  - *Adding the delete view*
  - *Updating the delete link*
  - *Details*
  - *Summary*
  
- **18. Authenticating users with Allauth**
  - *Setup*
  - *Installing Allauth*
  - *Creating template files*

- *Updating the templates for Bootstrap 4*
- *Details*
  - *Configuration options*
  - *Adding the paths*
  - *django-widget-tweaks*
- *Summary*
  
- **19. Authorization**
  - *Setup*
  - *Adding the Editor group*
  - *Creating a test user*
  - *Using permissions*
  - *Using decorators*
  - *Details*
    - *Authentication vs authorization*
    - *Controlling access with decorators*
  - *26.7 Summary*
  
- **20. Creating an image gallery**
  - *Setup*
  - *Installing pillow*
  - *Configuring media variables*
  - *Adding ImageField*
  - *Adding images to flowers*
  - *Using the static helper function*
  - *Adding the grid*
  - *Details*
  - *Summary*
  
- **21. Adding image thumbnails**
  - *Setup*
  - *Installing ImageKit*
  - *Adding the thumbnail field*
  - *Details*
  - *Summary*
  
- **22. Deploying on Heroku**
  - *Setup*
  - *Creating a Heroku app*
  - *Installing Heroku CLI*

- *Installation in Windows*
- *Installation in macOS*
- *Installation in Ubuntu*
- *Authenticating with a browser*
- *Creating a Procfile*
- *Updating the settings.py file*
- *Creating the repository*
- *Pushing changes*
- *Updating the database*
- *Summary*
  
- **23. Using Amazon AWS to serve files**
  - *Setup*
  - *Creating an Amazon AWS bucket*
  - *Setting up permissions*
  - *Updating settings.py file*
  - *Adding an image field to the Post model*
  - *Installing packages*
  - *Summary*
  
- **24. Setting up Heroku pipelines**
  - *Setup*
  - *Creating a GitHub repository*
  - *Creating a pipeline*
  - *Testing deployment*
  - *Adding a production app*
  - *Enabling review apps*
  - *Using pull requests*
  - *Deleting the branch*
  - *Summary*
  
- **25. Sending emails with SendGrid**
  - *Creating an account*
  - *Summary*
