PHP 2

10 Web Fundamentals

Setting Cookies

Reading Cookie Values

Deleting Cookies

Building a Query String

Reading the POST Request Body

Using HTTP Basic or Digest Authentication

Using Cookie Authentication

Reading an HTTP Header

Writing an HTTP Header

Sending a Specific HTTP Status Code

Redirecting to a Different Location

Flushing Output to the Browser

Buffering Output to the Browser

Compressing Web Output

Reading Environment Variables

Setting Environment Variables

Communicating Within Apache

Redirecting Mobile Browsers to a Mobile Optimized Site

Program: Website Account (De)activator

Program: Tiny Wiki

Program: HTTP Range

11 Forms

Processing Form Input

Validating Form Input: Required Fields

Validating Form Input: Numbers

Validating Form Input: Email Addresses

Validating Form Input: Drop-Down Menus

Validating Form Input: Radio Buttons

Validating Form Input: Checkboxes

Validating Form Input: Dates and Times

Validating Form Input: Credit Cards

Preventing Cross-Site Scripting

Processing Uploaded Files

Working with Multipage Forms

Redisplaying Forms with Inline Error Messages

Guarding Against Multiple Submissions of the Same Form

Preventing Global Variable Injection

Handling Remote Variables with Periods in Their Names

Using Form Elements with Multiple Options

Creating Drop-Down Menus Based on the Current Date

12 Database Access-Using PHP with MySQL

Using DBM Databases

Connecting to MySQL

Connecting to an SQL Database

Querying an SQL Database

Retrieving Rows Without a Loop

Modifying Data in an SQL Database

Repeating Queries Efficiently

Finding the Number of Rows Returned by a Query

Escaping Quotes

Logging Debugging Information and Errors

Creating Unique Identifiers

Building Queries Programmatically

Making Paginated Links for a Series of Records

Caching Queries and Results

Accessing a Database Connection Anywhere in Your Program

Program: Storing a Threaded Message Board

Ensuring Secure SQL

13 Sessions and Data Persistence

Using Session Tracking

Preventing Session Hijacking

Preventing Session Fixation

Storing Sessons in Memcached

Storing Sessions in a Database

Storing Arbitrary Data in Shared Memory

Caching Calculated Results in Summary Tables

14 XML

Generating XML as a String

Generating XML with DOM

Parsing Basic XML Documents

Parsing Complex XML Documents

Parsing Large XML Documents

Extracting Information Using XPath

Transforming XML with XSLT

Setting XSLT Parameters from PHP

Calling PHP Functions from XSLT Stylesheets

Validating XML Documents

Handling Content Encoding

Reading RSS and Atom Feeds

Writing RSS Feeds

Writing Atom Feeds

15 Web Automation

Marking Up a Web Page

Cleaning Up Broken or Nonstandard HTML

Extracting Links from an HTML File

Converting Plain Text to HTML

Converting HTML to Plain Text

Removing HTML and PHP Tags

Responding to an Ajax Request

Integrating with JavaScript

Program: Finding Stale Links

Program: Finding Fresh Links

16 Consuming RESTful APIs

- Fetching a URL with the GET Method
- Fetching a URL with the POST Method and Form Data
- Fetching a URL with an Arbitrary Method and POST Body
- Fetching a URL with Cookies
- Fetching a URL with Arbitrary Headers
- Fetching a URL with a Timeout
- Fetching an HTTPS URL
- Debugging the Raw HTTP Exchange
- Making an OAuth 1.0 Request
- Making an OAuth 2.0 Request

17 Serving RESTful APIs

- Exposing and Routing to a Resource
- Exposing Clean Resource Paths
- Exposing a Resource for Reading
- Creating a Resource
- Editing a Resource
- Deleting a Resource
- Indicating Errors and Failures

Supporting Multiple Formats

18 Internet Services

Sending Mail

Sending MIME Mail

Reading Mail with IMAP or POP3

Getting and Putting Files with FTP

Looking Up Addresses with LDAP

Using LDAP for User Authentication

Performing DNS Lookups

Checking If a Host Is Alive

Getting Information About a Domain Name

19 Graphics

Drawing Lines, Rectangles, and Polygons

Drawing Arcs, Ellipses, and Circles

Drawing with Patterned Lines

Drawing Text

Drawing Centered Text

Building Dynamic Images

Getting and Setting a Transparent Color

Overlaying Watermarks

Creating Thumbnail Images

Reading EXIF Data

Serving Images Securely

Program: Generating Bar Charts from Poll Results
