

IOS Swift Programming 2

8 Security

Authenticating the User with Touch ID

Enabling Security and Protection for Your Apps

Storing Values in the Keychain

Finding Values in the Keychain

Updating Existing Values in the Keychain

Deleting Existing Values in the Keychain

Sharing Keychain Data Between Multiple Apps

Writing to and Reading Keychain Data from iCloud

Storing Files Securely in the App Sandbox

Securing Your User Interface

9 Core Location, iBeacon, and Maps

Detecting Which Floor the User Is on in a Building

Defining and Processing iBeacons

Pinpointing the Location of a Device

Displaying Pins on a Map View

Displaying Custom Pins on a Map View

Searching on a Map View

Displaying Directions on the Map

Customizing the View of the Map with a Camera

10 Gesture Recognizers

Detecting Swipe Gestures

Detecting Rotation Gestures

Detecting Panning and Dragging Gestures

Detecting Long Press Gestures

Detecting Tap Gestures

Detecting Pinch Gestures

Detecting Screen Edge Pan Gestures

11 Networking and Sharing

Downloading Data Using NSURLSession

Downloading Data in the Background Using NSURLSession

Uploading Data Using NSURLSession

Downloading Asynchronously with NSURLConnection

Handling Timeouts in Asynchronous Connections

Downloading Synchronously with NSURLConnection

Customizing URL Requests

Sending HTTP Requests with NSURLConnection

Serializing and Deserializing JSON Objects

Integrating Social Sharing into Your Apps

12 Multimedia

Playing Audio Files

Recording Audio

Playing Video Files

Capturing Thumbnails from Video Files

Accessing the Music Library

13 Address Book

Retrieving a Person Entity with System UI

Retrieving a Property of a Person Entity with System UI

Requesting Access to the Address Book

Retrieving All the People in the Address Book

Retrieving Properties of Address Book Entries

Inserting a Person Entry into the Address Book

Inserting a Group Entry into the Address Book

Adding Persons to Groups
